# Biosensors market report

## MARKET RESEARCH FUTURE

Research and Studies for Future, Good Better and the Best...

### Global Biosensors Market Research Report- Forecast 2020

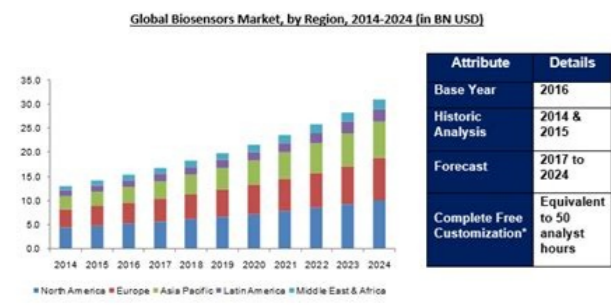

#### Market Scenario:

Globally the market for biosensor is increasing moderately. Biosensor is device composed of transducer and biological element for providing analytical information. These devices convert biological response into an electrical response, to recognize the function and structure of various molecules. Biosensors are complicated and effective device capable of fast detection and measuring wide spectrum in various applications. It has various applications in the field of healthcare, industrial process control, military application, environmental monitoring, agriculture and veterinary monitoring. The global biosensor market is growing moderately due to increase in prevalence of diabetic population, rise in geriatric population, increasing demand of POC, rising prevalence of chronic and lifestyle associated diseases, and increasing application of biosensors in various industries. Biosensor industry is expected to grow at a CAGR of 9.6% from 2014 to 2020.

**Market Analysis**

2022 Biosensors Market Medical Diagnostics application was approximately 60% of total market, followed by Food Industry, POC Testing, and Pharmaceutical Diagnostics. The market is expected to grow at a CAGR of 9.6% from 2014 to 2020.

Year	Market Size (\$Million)	Food Industry	POC Testing	Pharmaceutical Diagnostics	Research Laboratories
2014	100	50	150	100	100
2015	110	55	160	110	110
2016	120	60	170	120	120
2017	130	65	180	130	130
2018	140	70	190	140	140
2019	150	75	200	150	150
2020	160	80	210	160	160
2021	170	85	220	170	170
2022	180	90	230	180	180
2023	190	95	240	190	190
2024	200	100	250	200	200
2025	210	105	260	210	210
2026	220	110	270	220	220

In addition, with the advent of coronavirus and its rapid spread, consumers are investing in oximeters, which are biosensors that monitor oxygen levels and blood pressure. Read more about this report - Request a free sample copy in PDF Biosensors: Defining and targeting industry biosensors are self-contained analytical devices that are used to detect the presence of a biological analyte. Delivery format delivered as a PDF and Excel attached by e-mail, with an option to receive an editable PPT, according to the purchase option. In addition, the growing use of biosensors in the food and beverage industry has further increased the region's market share in the global biosensor industry. Read more about this report - Request a free sample copy of the PDF North America to show significant growth in the global biosensor industry. The North American region is predicted to take a considerable share of the global biosensor industry. Biosensors International Groups Ltd. In addition, this growth is due to the increasing incidences of diseases, which can be tracked and monitored by biosensors in the region, such as diabetes. This biological reaction is converted into an electrical signal by the transducer. The device comprises a transducer and a biological component, such as an enzyme, that reacts to interaction with a biological analyte. The global biosensor market stood at a value of about \$20.93 billion in 2020. Rapid technological advances and the increasing cases of chronic diseases to reinforce the growth of biosensors in the global biosensor industry are being increasingly used in biomedicine, food safety standards, defense, security and environmental monitoring, and with rapid advances, biosensor devices have become extremely useful in the health sector. The trends of nanotechnology base biosensors increased the biosensor sensitivity limit. Report report details. Report. Year 2020 Historical Period 2017-2021 Forecast Period 2022-2027 Scope of the Report Historical and Forecast Trends, Industry Drivers and Constraints, Historical and Forecast Market Analysis by Segment-A Product, Technology, Region Breakup by A Product Wearable, Non-Wearable Breakup by A Technology Electrochemical, Optical, Piezoelectric, Thermal Biosensors, Nanomechanical Breakup by Region North America, Europe, Asia Pacific, Latin America, Middle East and Africa Market Dynamics SWOT, Porter's Five Forces, EMR ReAAA's Key Indicators for Price and Demand Competitive Landscape Market Structure, Company Profiles- Company Overview, Product Portfolio, Demographic Reach and Achievements, Certifications Companies Covered AgaMatrix Holdings LLC, Abbott Laboratories Inc., Biosensors International Group, Ltd., Medtronic Inc., Others Report Price and Purchase Option Explore our purchase options that are best suited to your resources and industry needs. Biosensors are used in multiple ways and can, therefore, be referred to as immunosensor, optodes, glucometers, biocomputers and biochips, among others. Read more about this report - REQUEST FREE SAMPLE COPY IN PDF By product, the market is bifurcated into: On the basis of technology, the industry can be categorized into: Electrochemical, Optical, Piezoelectric Thermal Biosensors Nanomechanical The regional markets for the product include North America, Europe, the Asia Pacific, Latin America, and the Middle East and Africa. These are some of the factors that are expected to impact the overall growth of the biosensors industry positively. Medtronic Inc. It recognizes the analyte and produces a measurable signal. According to the statistics provided by the American Diabetes Association, diabetes is the 7th primary cause of death in the United States, and around 1.5 million Americans are diagnosed with diabetes every year. Furthermore, the rising spread of chronic diseases such as diabetes and other cardiovascular diseases have increased the market demand for biosensors, such as biosensors for blood glucose monitoring, pregnancy tests, and cholesterol monitoring. This increase can be attributed to the increased implementation of biosensors in the region. These are portable and allow people to have a home diagnosis, which is cost-effective and reduces the time needed for diagnosis. Wearable segment to account for substantial share of global biosensor industry Based on the product, the wearable segment is expected to hold a significant share in the global biosensor industry in the forecast period. Some commonly found biosensors include store-bought pregnancy tests and glucose detectors. In addition, through wearable biosensors, patients can monitor their health status in real time, which helps in effective treatment and early detection of diseases, which could reduce the risk of mortality. Other The comprehensive EMR report provides an in-depth assessment of the industry based on Porter's five forces model and SWOT analysis. Key Players in the Global Biosensors Market The report presents a detailed analysis of the following key players in the global biosensors market, covering their competitive landscape, capabilities and latest developments such as mergers, acquisitions and investments, capacity expansions and plant turnarounds: AgaMatrix Holdings LLC Abbott Laboratories Inc. The market is expected to grow at a CAGR of 8.9% over the forecast period 2022-2027 to reach a value of about \$34.6 billion by 2026. This growth can be attributed to the increasing incidence of diabetes and cardiovascular diseases, which require regular monitoring and instant diagnosis.

REPORT COVERAGE. The global telehealth market research report presents an inclusive global market assessment by offering valuable insights, facts, industry-related information, and historical data. Numerous methodologies and approaches are adopted to make meaningful assumptions and views. Biosensors & Bioelectronics is the principal international journal devoted to research, design, development and application of biosensors and bioelectronics. It is an interdisciplinary journal serving professionals with an interest in the exploitation of biological materials and designs in novel diagnostic and electronic devices including sensors, DNA chips, electronic noses, lab-on-... The report was well researched and the market data was accurate. P&S Intelligence quick report delivery helped us leverage the market opportunities and get ahead of our competitors. Vice President, Automotive Component Manufacturer. What our clients have to say about us. 08/02/2022 - The "Global Biosensor for COVID-19 Market" report 2022-2028 offers in-depth information as well as a comprehensive overview of the highly 19/01/2022 - CRISPR-Cas systems have a great and still largely untapped potential for in vitro applications, in particular, for RNA biosensing. However, there is currently no systematic guide on selecting the most appropriate RNA-targeting CRISPR-Cas system for a given application among thousands of potential candidates. We provide an overview of the currently described Cas ... 20/01/2022 - Global Microbiome Adoption Market Research Report 2021: Advancements in Analytical Methods and Digital Tools Fuel Growth Opportunities in Microbiome Research and Product Development 20/01/2022 - Global Microbiome Adoption Market Research Report 2021: Advancements in Analytical Methods and Digital Tools Fuel Growth Opportunities in Microbiome Research and Product Development The report was well researched and the market data was accurate. P&S Intelligence quick report delivery helped us leverage the market opportunities and get ahead of our competitors. Vice President, Automotive Component Manufacturer. What our clients have to say about us. 21/01/2022 - DUBLIN, January 21, 2022--The "Photonic Integrated Circuit (PIC) - Global Market Trajectory & Analytics" report has been added to ResearchAndMarkets.com's offering. 24/01/2022 - According to the market intelligence research report by InsightAce Analytic, the global Continuous Glucose Monitoring (CGM) Sensors market size was valued at US\$ 3.6 Billion in 2021, and it is expected to reach US\$ 11.7 Billion in 2028, recording a promising CAGR of 18% from 2021 to 2028. 19/01/2022 - PPG (Photoplethysmography) Biosensors Market report comprises of data that can be quite essential when it comes to dominate the market or making a mark in the market as a new emergent. The market ... 01/02/2022 - At 12.82% CAGR, Omega-3 Market to hit USD 4215.7 Million, Globally by 2028, says Brandessence Market Research At 6.71% CAGR, Aloe Vera Gel Market Size to hit USD 412.9 Million, globally by 2028 ... The purpose of this exploratory study was to determine whether liver dysfunction can be generally classified using a wearable electronic nose based on semiconductor metal oxide (MOx) gas sensors, and whether the extent of this dysfunction can be quantified. MOx gas sensors are attractive because of their simplicity, high sensitivity, low cost, and stability. A total of 30 ...
